

McCallum Park Playground

McCallum Park Playground

Blackwell & Associates

The first stage in the realisation of the McCallum Park and Taylor Reserve Master Plan is a playground concept based upon the Year of the Built Environment celebrations in 2004. The main focus of the project was to develop this combined open space as a family destination and a place to recreate for both the local and regional community.

Centred on the adjacent Swan River, the playground incorporates iconic Perth locations such as the Perth Zoo, the CBD district and Kings Park. From the start of the project, this regional park was intended as an inclusive and challenging play space for children of all ages and abilities.
